Professional Experience

Tacit Solutions Group – Business Automation Specialist

July 2025 – Present

- Built a complete custom CRM** for managing Agents, Clients, Doctors, and contract workflows using Airtable, n8n, and Docuseal, enabling automated contract creation, monitoring, and sending.
 - Developed an AI-powered image generation system** using **Gemini Image Generation** and **Gemini**, integrated with **n8n** and the **LinkedIn API**, to automatically create branded marketing visuals and publish them on LinkedIn.
 - Implemented an applicant screening system** that captures form submissions directly into the CRM and automatically alerts stakeholders using Airtable and Slack, improving response speed to qualified applicants.
 - Automated invoice generation** by integrating Connecteam, n8n, and PDF.co, eliminating manual calculations and ensuring accurate invoice production from agent timesheets.
 - Developed an AI-powered postoperative virtual receptionist** using n8n, Twilio, Azure OpenAI, and PostgreSQL, capable of messaging patients after surgery, answering symptom-related questions, and providing triage guidance.
- Freelancer. – Business Automation Specialist

Freelancer – Business Automation Specialist

March 2025 – Present

- Reduce Document Processing costs by using automation tools such as N8N
- Built AI-powered email processing system that automated task creation and calendar event scheduling, improving efficiency 24/7.
- Identifying business pain points and designing automation and AI-driven solutions to streamline workflows and improve efficiency.

Accenture Inc. – Application Development Senior Analyst

Dec 2021 – Feb 2025

- Integrated Salesforce with third-party applications using REST APIs, Flows and APEX to enable seamless data exchange, ensuring real-time synchronization and enhancing operational efficiency.
- Implemented Single Sign-On (SSO) for Salesforce, streamlining user authentication processes, improving security, and enhancing user experience across the organization.
- Led a team of developers in delivering complex Salesforce solutions, improving business workflows by 20%.
- Developed custom components using Apex triggers and Flows, driving a 30% improvement in task automation.
- Utilized Azure DevOps to manage the lifecycle of user stories, ensuring timely completion and deployment.
- Conducted code reviews and provided mentorship to junior developers, resulting in a 15% reduction in bugs.
- Managed seamless migrations via Copado, collaborating with stakeholders for approvals and production releases.

Accenture Inc. – Application Development Analyst

Jan 2020 – Dec 2021

- Processed and imported large datasets (500k+ records) using Salesforce tools, achieving a 99.8% accuracy rate.
- Facilitated data repair and remediation processes, reducing data discrepancies by 25%.
- Coordinated with global partners to ensure smooth data import/export operations, improving client satisfaction.

Accenture Inc. – Associate Software Engineer

Oct 2016 – Apr 2018

- Built and maintained automation scripts using Ranorex and Selenium, optimizing testing processes.
- Integrated automation tools with TFS and DevOps for version control and CI/CD.
- Conducted feasibility studies to ensure tools met client requirements and budgets.

Potatocodes – Web Developer

Jul 2015 – Sep 2015

- Developed websites using PHP frameworks such as CodeIgniter and Laravel, ensuring high-quality agile delivery.
- Worked with WordPress and Drupal for content management, customizing features based on client needs.

Education

Bachelor of Science in Information Technology
University of Santo Tomas – Manila (2012-2016)
